Approved Oils  
Volvo Components

## Approved Oils, Volvo Components

This Service Bulletin identifies the oil requirements and lists the companies offering oil types and qualities required for Volvo components.

For oil change intervals, refer to Service Bulletin 175-60, Oil and Filter Change Intervals for Volvo Components.

**Note:** Failure to follow these recommendations may void any and all applicable engine, transmission and drive line warranties.

### Contents

- "Approved Oils, Volvo Transmissions", page 12

# Approved Oils

## Approved Oils, Volvo Engines

### Engine Oil Type/Quality

See the engine types for recommended oil change intervals. The intervals do not cover all applications. In on/off highway driving, severe off-highway, continuous stop-and-go city driving and extremely high mileages, the oil change interval needs to be customized for the best protection and economy. Change all oil filters at each oil change.

Synthetic oils do not allow further extension of oil drain intervals. It is the contamination rate (i.e., soot and the depletion of additives) rather than base oil quality that determines the useful engine oil life and therefore the oil change intervals.

**Note:** Engines meeting the emissions requirements of 2007 and later are designed with exhaust aftertreatment systems requiring a new engine oil quality. This has lead Volvo to require an oil that meets VDS-4 quality standards for model year 2007 and later Volvo engines. The VDS-4 quality standard is based on the newly developed API CJ-4 engine oil specification, but has additional performance requirements essential to adequately protect the Volvo engines at the drain intervals specified. So, all oils listed in this bulletin also meet the API CJ-4 specification. Pre-2007 engines also work better with the above mentioned oils, but are not required.

 <b>CAUTION</b>
Extra oil additives must never be added to any oil used.

## VDS-4 Approved Engine Oils

**Note:** All the oils listed in the following table meet the VDS-4 standard. They also meet VDS-2, VDS-3, EO-N Premium Plus and API CJ-4 quality standards. Oil from this list is **REQUIRED** for model year 2007 and later Volvo engines and are recommended for earlier engines.

Supplier	Brand Name	Viscosity Grade

## Approved Oils, Volvo Transmissions

### Transmission Oil Type/Quality

 **CAUTION**

Only use VOLVO-approved synthetic transmission oil in the I-Shift transmission. Using non-approved transmission oil can result in damage to transmission components.

 **CAUTION**

Drained I-Shift synthetic oil must NEVER BE REUSED and must be replaced along with the transmission oil filter when the transmission oil is changed.

VOLVO I-shift transmissions are factory filled with oil according to VOLVO STD 1273,18 (Transmission Oil 97318). This oil type allows 800.000 Km (500.000 mi) oil drain intervals in the "D" and "E" Design Level I-shift transmissions in on the road long haul applications with a maximum 80.000 lbs GCW. Oils meeting Volvo STD 1273,19 (Transmission Oil 97319) can also be used for this purpose.

For a service fill, please use VOLVO I-shift Transmission Fluid 75W-80 available in 5 USG and 4 x 1 USG containers.

**Note:** Should this oil not be available, please use other approved oils.

<b>Extended drains: Transmission oils 97318 and 97319 (800000 Km [500,000 mi])</b>		
<b>Supplied</b>	<b>Brand Name</b>	<b>Viscosity Grade</b>
VOLVO Trucks North America	Volvo I-Shift Transmission Fluid	75W-80
Castrol Ltd.	Syntrans	75W-85
Chevron Lubricants	Chevron Multigear MTF HD	75W-80
Chevron Lubricants	Chevron Multigear MTF HD	75W-90
Chevron Lubricants	Texaco Multigear MTF HD	75W-80
Mobil Branded Lubricants (ExxonMobil Corp)	Mobil Delvac Synthetic Transmission Oil V 30	75W-80

For other applications than mentioned above, the oil drain interval is maximum 400.000 Km (250.000 mi) (Regular drains). VOLVO Trucks North America recommends VOLVO I-shift Transmission Fluid 75W-80 also in these applications. However, should this oil not be available, any other approved oil for extended drains (table above) or regular drains (table below) can be used.
